Paying off my credit card debt in full

Paying off my \$3,000 credit card debt in full

To successfully do this, I will put \$300 plus interest every month towards paying off my credit card. I will also stop using it temporarily to avoid accumulating additional debt

I will be able to save \$300 a month and avoid using my credit card by cutting my entertainment budget and using the time I usually use spending money on entertainment to pick up extra shifts

By applying \$300/month plus interest towards paying off debt, I will achieve this in 10 months
